Madi's Story

My name is Madi and I'm almost 15 years old.

When I was three, I was diagnosed with having a Retinoblastoma in my right eye. Even though it was a cancerous tumor, I didn't have to go through radiation or chemotherapy, but I did have to have my eye removed.

I now have a prosthetic eye, but I could not be happier or luckier.

I don't remember my ordeal, but I live with the results of it every day of my life.

I hope my story has helped you in some way!
